Summary

Software Engineer with hands-on experience in full-stack development (MERN) and Machine Learning. Skilled in building scalable AI-integrated web applications and data-driven solutions using Python, React, and cloud technologies.

Education

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Bachelor of Technology in Computer Science and Engineering

Sep 2024 – Jun 2028

Noida, Uttar Pradesh

CBSE Board

12th Grade

Graduated: 2024

Noida, Uttar Pradesh

CBSE Board

10th Grade

Graduated: 2022

Noida, Uttar Pradesh

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C++, SQL

AI & Data Science: PyTorch, TensorFlow, Scikit-learn, OpenCV, MediaPipe

Web Frameworks: React.js, Node.js, Express.js, Django, FastAPI

Databases & Cloud: PostgreSQL, MongoDB, Firebase, GCP

Tools & Environments: Git/GitHub, CI/CD, Jupyter/Colab, Postman, Docker

Projects and Experience

Current Capital - Finance Manager | *React, Node.js, Express, Tailwind, Gemini AI* | [Live](#) | [GitHub](#)

Feb 2026

- Built a full-stack personal finance web app for automated expense tracking and dynamic envelope budgeting.
- Engineered a microservices-based REST API with Node.js and Express, secured by JWT authentication.
- Enabled real-time financial analytics using custom Recharts to render zero-latency interactive data visualizations.
- Designed a responsive, glassmorphism-themed frontend architecture using React, Context API, and Tailwind CSS.
- Integrated Google Gemini Vision AI to automatically extract and categorize transaction data from receipt images.

Real-Time Hand Tracking Visualizer | *MediaPipe, Three.js, WebGL* | [Live](#) | [GitHub](#)

Mar 2026

- Built a real-time computer vision web app mapping 4 distinct hand gestures to 3D particle effects.
- Maintained 60 FPS rendering and low-latency visual feedback entirely on the client side.
- Enabled real-time spatial mapping of hand landmarks to dynamic WebGL animations.
- Integrated Google MediaPipe for gesture recognition and Three.js for high-performance graphics.
- Designed a lightweight, browser-based architecture requiring zero external hardware.

Health Assistant Platform | *React, Supabase, Medical APIs* | [Live](#) | [GitHub](#)

Sep 2025

- Built a full-stack health platform via Agile/Scrum and cross-functional collaboration, clearing the SIH 2025.
- Led system design for a Supabase backend and medical APIs, achieving <250ms latency.
- Built a real-time React medical reminder system, using unit/integration testing to guarantee >95% reliability.

Certifications & Achievements

Smart India Hackathon (SIH) 2025 | *Team Leader*

- Led a 6-member team at SIH 2025 to clear the national internal selection round, enforcing strict code review practices to build a production-grade healthcare platform under a 48-hour deadline.

Professional Certifications

- [Google Advanced Data Analytics Professional Certificate](#)
- [Google IT Automation with Python Professional Certificate](#)
- [Agentic AI with LangGraph, CrewAI, AutoGen and BeeAI](#)
- [Advanced RAG with Vector Databases and Retrievers](#)
