

Rayhan Khan

Software Engineer

khanrayhan8307@gmail.com | 9315945414 | Noida, Uttar Pradesh | [Portfolio](#) | [Github](#) | [LinkedIn](#) | [Leetcode](#)

Summary

Software Engineer specializing in the MERN stack and advanced Python ecosystems. Focused on architecting scalable web platforms, developing intuitive user interfaces, and engineering robust, data-driven solutions.

Education

Bachelor of Technology in Computer Science and Engineering Dr. A.P.J. Abdul Kalam Technical University (AKTU)	09/2024 - Present
12th Grade (CBSE)	Graduated: 2024
10th Grade (CBSE)	Graduated: 2022

Skills

Languages: Python, C, C++, Java

Python: Pandas, Tkinter, OpenCV, MediaPipe, NumPy, APIs.

Web Dev: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB (MERN Stack)

Core: Data Structures & Algorithms, OOP, DBMS

Tools: Git, GitHub, Firebase, VS Code

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability

Projects

Current Capital - Finance Manager | [Live Demo](#) | [Github](#)

- Built a full-stack personal finance web app for automated expense tracking and dynamic envelope budgeting.
- Engineered a low-latency REST API with Node.js and Express, protected by stateless JWT authentication.
- Enabled real-time financial analytics using custom Recharts to render zero-latency interactive data visualizations.
- Designed a responsive, glassmorphism-themed frontend architecture using React, Context API, and Tailwind CSS.
- Integrated Google Gemini Vision AI to automatically extract and categorize transaction data from receipt images.

Real-Time Hand Tracking Visualizer | [Live Demo](#) | [Github](#)

- Built a real-time computer vision web app mapping 4 distinct hand gestures to 3D particle effects.
- Maintained 60 FPS rendering and low-latency visual feedback entirely on the client side.
- Enabled real-time spatial mapping of hand landmarks to dynamic WebGL animations.
- Integrated Google MediaPipe for gesture recognition and Three.js for high-performance graphics.
- Designed a lightweight, browser-based architecture requiring zero external hardware.

Health Assistant Platform | [Live Demo](#) | [Github](#)

- Led team to build a full-stack health platform, clearing the SIH 2025 internal round.
- Architected a fault-tolerant Supabase backend with medical APIs, achieving <250ms response times.
- Engineered 5+ React modules and a real-time medical reminder system with >95% reliability.

Certifications

- [SQL and Relational Databases | IBM](#)
- [Python Essentials | Cisco](#)
- [Intro to Machine Learning | Kaggle](#)
- [Google Analytics Certification | Google](#)

Achievements

- Team Leader, Smart India Hackathon (SIH) 2025:** Successfully led a development team to clear the college internal round for a national-level hackathon by building a comprehensive healthcare platform.
